SUMMARY

Junior Full-Stack Developer and Digital Technology Innovation student building web apps with Next.js, React, NestJS, Express, Prisma, PostgreSQL and TypeScript. Currently organizing my university's hackathons and building the event website, and a two-time contributor to open-source community projects. Strong in authentication, REST API design and documentation, testing and code review.

EXPERIENCE

Full-Stack Developer & Organizer — Kasem Bundit University Hackathon, Bangkok Sep 2026 – Present

- Organize the university's hackathons and build the event website as the developer in charge.
- Built event discovery, team management, participant registration, project submission and announcement features, plus a sponsor section showcasing the university's sponsors.
- Implemented role-based auth and protected workspaces for teams, organizers and administrators.
- Designed the backend with server actions, service layers, Prisma and PostgreSQL; added student email verification, audit logging, Cloudflare R2 uploads and SMTP notifications.

Tech: Next.js, TypeScript, PostgreSQL, Prisma, Better Auth, Docker, Zod, Cloudflare R2

OPEN-SOURCE COMMUNITY CONTRIBUTIONS — ONE PROJECT, ONE MONTH

Full-Stack Developer — Blood Donation Management System Feb 2026 – Mar 2026

- Built responsive React, TypeScript and Tailwind CSS interfaces for blood donor registration and management.
- Worked on both the React frontend and the NestJS backend; integrated REST APIs for donor information, blood inventory and donation records.
- Took part in code reviews with the team.

Tech: React, TypeScript, Tailwind CSS, NestJS

Backend Developer — Utility Management System (Nest Flow) Oct 2025 – Nov 2025

- Developed utility data management APIs for apartments and condos with Express.js, Prisma and PostgreSQL.
- Built the authentication module with validation and secure flows; wrote full Swagger/OpenAPI documentation.
- Performed code reviews and collaborated with contributors on clean, maintainable architecture.

PROJECTS

TCL Guide — Full-Stack Developer Live | GitHub

- Local discovery platform for Tachileik, Myanmar: one searchable, map-based business directory (Next.js + NestJS Turborepo monorepo, tested with Vitest and Supertest).
- Deployed the API to Azure App Service with a Docker + GitHub Actions CI/CD pipeline (image built and pushed to Docker Hub on every merge to main); web app hosted on Vercel.
- PR pipeline runs lint, format, type-check and tests in parallel and gates the build on all four.

Tech: Next.js, NestJS, Prisma, Neon Postgres, Neon Object Storage, Better Auth, shadcn/ui, Docker, GitHub Actions, Azure, Vercel

Recall — Full-Stack Developer Live | GitHub

- Read-it-later library that scrapes URLs into clean Markdown with AI-generated summaries and tags.

Tech: TanStack Start, Firecrawl, Vercel AI SDK, Prisma, PostgreSQL, Better Auth

Car Dealership Management App — Full-Stack Developer Live | GitHub

- Admin dashboard for vehicle inventory, employee records, expense tracking and profit analytics.

Tech: Next.js, Prisma, PostgreSQL, Better Auth, TanStack Query, Zod, Vitest

Break-Even Point Calculator — Developer Live | GitHub

- Calculator that finds a product's break-even point from cost and price, with validation and unit/component tests.

Tech: Next.js, TypeScript, Zustand, React Hook Form, Zod, Jest, React Testing Library

EDUCATION

B.Sc. in Digital Technology Innovation — Kasem Bundit University, Bangkok May 2024 – Present

Programming fundamentals, object-oriented programming and software development; hands-on Java and Python coursework.

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, TanStack Start/Query/Table/Form, Tailwind CSS, shadcn/ui, Redux Toolkit, RTK Query, Zustand, React Hook Form, Motion, HTML5, CSS3
Backend: Node.js, Express, NestJS, REST, GraphQL, Apollo, Better Auth, Swagger/OpenAPI
Databases: PostgreSQL (Neon), MySQL, MongoDB, SQLite, Prisma, Mongoose, Neon object storage
Tools & Testing: Git, GitHub Actions (CI/CD), Docker, Turborepo, Jest, Vitest, React Testing Library, Supertest, Zod, Vercel, Azure, Neon, Bun, pnpm
Familiar with: Java, Spring Boot, Python, PHP, Laravel
